

HOW TO PACKAGE EXCHANGE MOTHERBOARDS

STEP 1:

Place **each** motherboard in its own Anti-Static bag or any reclosable or non-reclosable plastic bag.

Note: Two boards **cannot** share a bag. Boards should not touch each other.

STEP 2:

Lay down a layer of bubble, and lay a few boards on the bubble, spacing them enough so they will not be touching.

Do not stack them

STEP 3:

Continue to place a layer of bubble on top of the boards and repeat steps 2 & 3 until box is full and tightly packed.
